***LRI Perforating Systems Inc. (LRI) and DYNAenergetics GmbH & Co.KG, are pleased to introduce the new LRI line of shaped charges, manufactured by DYNAenergetics for LRI.***

These shaped charges have been engineered for LRI's gun systems, allowing LRI to market a complete branded system inclusive of hardware, shaped charges and detonating cord. This LRI line will grow in order to meet our current and future customers' domestic and worldwide requirements. DYNAenergetics brand products including shaped charges, detonating cord, detonators, hardware and specialty perforating equipment are also now available in Canada through LRI.

LRI manufactures and distributes a market-leading line of fully engineered perforating guns, wireline accessories, tubing conveyed perforating equipment, explosive shaped charges, well stimulation products and other related goods. Distributing from 7 locations in Alberta and internationally from our head office and manufacturing plant, LRI has established a new standard in perforating product reliability.

DYNAenergetics manufactures, markets and sells explosives and associated hardware for international oil field, seismic prospecting and decommissioning applications. DYNAenergetics has been producing detonating cords, detonators and seismic explosives for decades, and since 1994 has increased their focus on strengthening and broadening the oil field related product line to include shaped charges, hardware and pipe recovery tools.

Research and development activities are extensive at both LRI and DYNAenergetics; with the mutual goal to provide optimal solutions to industry's challenges, our engineers, technologists, sales people and distributors, are in constant collaboration with our customers.

*LRI's manufacturing plant and DYNAenergetics are both ISO 9001:2000 registered; DYNAenergetics additionally is ISO 14001:2004 registered.*
